# DELPHINIUMS A SPECIALTY

## DELPHINEUMS PRICE LIST

The marvelous "WREXHAM" seedlings which so resembles the hollyhock, were brought from Wales, and first shown in 1921 at the London Exhibition, where they were greatly admired for their beauty.

This strain has broad based tall spikes with large individual flower of a rich deep shade, which is the ambition of experienced growers.

After no end of effort on my part, say nothing of expense, I was able to obtain the seed for my start from the originator of this famous strain, Mr. Watkins Samuel. My success has been so phenomenal that I am now able to supply my customers with this choice seed at the very reasonable price of \$1.00 per package.

Can supply seed of "HOODACRES" Delphinium, which is a very fine and reliable variety, in liberal size packages at \$1.00 each.

F. C. BURN'S Delphinium is another very fine variety, which has a beautiful silvery sheen, and cannot be excelled for decorative purposes, and in great demand by florists. Liberal size packages \$1.00 each.

## CULTURE

To insure success, seed should be sown in flats in the greenhouse as early as February 15th or March 1st, depending upon the climate, and when they have reached a height of 2½ or 3 inches, set out in the garden in rows 2 by 4 feet apart.

Plant on well-drained ground and we recommend bonemeal ONLY as fertilizer.
